Turn Store Manager for Magento to Your Advantage

✓ A Cut Above the Rest!

Store Manager offers all necessary opportunities for fast store administration within one tool. Unlike modules that solve usually several specific tasks Store Manager simplifies and accelerates all aspects of store database management - products, categories, customers, orders, discounts management.

✓ Simple and Intuitive Interface

In comparison with a standard web store admin panel Store Manager offers much more convenient and user friendly interface. For a store owner this means faster updates of his

one or multiple stores. Store Manager doesn't require any programming skills and can be run by any Internet user.

✓ World-class Support and Software Updates

Top-notch software should come along with high-quality support. MagneticOne provides you with both to make sure that your business becomes even more effective and successful.

Store Manager for Magento Update Service allows you to purchase access (update service for 6,12,24 months) to latest releases and updates, download most recent versions including improvements and new features.

Store Manager for Magento is Your Path to Advanced Benefits

✓ Spend an Hour, Save a Day

Our customers acknowledge that Store Manager can save hours daily on store updates. If your Magento store database counts 1 000 products it usually takes 1-2 hours daily to update it (edit new/expired products, update prices, stock etc). Using Store Manager you will get this done in 10-15 minutes. From a monthly perspective Store Manager saves 30 to 40 hours - this is a whole week!

✓ The Power on Your Side

Buy one Store Manager instead of multiple modules. You can use one Store Manager license to manage your multiple stores.

Store Manager doesn't require any special skills to run so you don't have to pay a developer to keep your store database organized - you can do all necessary update yourself or hire a manager and direct your attention to other important business tasks.

✓ Free Yourself from Routine Tasks

Automating typical operations and spending less time to manage your store you increase the overall effectiveness of your business. Fast updates mean that your store database will always contain up to date information - actual prices, quantities, images and descriptions.
